

VI° LABORATORIO INTERNAZIONALE DI ARCHITETTURA E PAESAGGIO VI° INTERNATIONAL WORKSHOP OF LANDSCAPE AND ARCHITECTURE

Iglesias Monteponi (Sardinia, Italy), 28 November – 3 december 2022 / Call

MINERARY LANDSCAPES

Landscapes of energy. Air, light, water, earth

In its sixth edition, the International Architecture and Landscape Laboratory is dealing with the problem of transformations in the mining landscape caused by current environmental conditions and with the need to prefigure a new cultural and development horizon. It is a question that requires a project capable of bringing together architecture, engineering, infrastructures, techniques, the local context and socio-economic models.

The redevelopment, regeneration and environmental rehabilitation of abandoned mining and industrial sites represent, in this sense, a field of the project that, together with environmental recovery techniques and landscape architecture, explores symbolic images and expressive and formal potentials of these places.

This edition focuses in particular on the themes of the modification of mining landscapes through a redefinition of mining spaces and architecture in function of renewable energy production and from an ecological transition perspective.

Project themes

The design themes will be dedicated to a general reflection on the concept of "ecological transition" and on the urgencies related to the production of energy from renewable sources as an opportunity to reconsider the role of architecture and the architect as a builder of the future and of these places as spaces for experimentation. The theme, therefore, invites us to reflect on the nature-artifice binomial within a system of "ecological" relations and systems in transition.

Activities / Program

The laboratory is structured in design groups followed by one or more lecturers and tutors. These "laboratories" constitute the places in which to develop the knowledge of the context and the project themes up to the deepening of the theoretical and technical aspects.

Visiting Critics will discuss the work of the ateliers that will end with the exhibition of the work and the communication of the results to the public.

During this period the ateliers will take place alongside seminars and conferences.

Workshop activities will take place at the AUSI facilities in Iglesias.

Official languages of the seminar: Italian and English.

Registration procedure

The laboratory is aimed at postgraduates of no more than two years, at undergraduates and postgraduates of the Master's Degree in Architecture and the five-year Degree in Architecture (5th year), Planning and Engineering for the Environment and the Territory. The laboratory is also open to 2nd level Master's students, the Doctorate in Architecture, Planning, Civil Engineering, Environmental and Architecture and other specialization schools of the same level. Applications from graduates of disciplines related to other degree courses (Agriculture, Archeology, Earth Sciences, etc.) may be considered., applicants must send an application to info@consorzioausi.it by November 10, 2022.

The application (Annex A) must be accompanied by a CV (European model), a copy of an identity document and a declaration in lieu of certification (Annex B).

Participants will be selected through an evaluation of their CV. The expected number is 25 participants. The list of admitted candidates will be made public by November 15, 2022.

Participation in the workshop is free.

Guesthouses and meals

The selected students can stay at the Monteponi Guest House managed by the AUSI Consortium, subject to availability. For students hosted in this facility, a deposit of 60.00 euros is required which will be returned at the end of the workshop. A daily meal is provided.

Certificate of attendance and educational credits Participants will receive a certificate of participation and the recognition of 5 Credits. In the case of students coming from other degree courses, the credits will be recognized by the Study Programs.
